

Feature Comparison Guide

Utility Bill Tracking

| | EnergyCAP Enterprise | EnergyCAP Express |
|---|-------------------------------------|-------------------------------------|
| Account Tracking. Track any commodity, level, and type of bill detail, and standard and deregulated bills (separate LDC/supplier charges). Includes TreeView navigation, memo and message system. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| Accounts Payable or G/L Export. Export audited and approved bill records to an A/P or G/L system for final processing and payment, which eliminates double entry of billing data. | <input type="checkbox"/> | |
| Bill Accruals. Create estimated bills (accruals) based on historical bills to close out an accounting period. Export accrued bills to the General Ledger and reverse accrued transactions after the actual bill is received. | <input type="checkbox"/> | 2 Reports |
| Bill Audits. Verify utility bill accuracy and spot problems using over 50 available audits. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| Electronic Bill Import via EDI 810. Receive electronic bills from utility vendors in EDI 810 format. | <input type="checkbox"/> | |
| Electronic Bill Import via Flat File. Import historical and ongoing utility bill information in Microsoft Excel or comma separated value file formats (.xls, .xlsx, .csv, .dat, or .txt). | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| Energy Contract Administration. Manage energy supply and performance contracts by vendor. Associate contracts with one or more accounts, and enter contract details. | <input checked="" type="checkbox"/> | |
| Issue Tracker. Work order system used to track, report, email, and manage savings and problems. | <input checked="" type="checkbox"/> | Limited |
| Workflow Management. User configurable workflow settings for processing of utility bills. | <input checked="" type="checkbox"/> | Limited |

Savings & Analysis

| | | |
|--|-------------------------------------|-------------------------------------|
| Benchmarking Charts. Rank and compare buildings and meters within peer groups. Instantly highlight outliers (abnormal meters, buildings, and bills) and prioritize energy conservation efforts. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| Budgets & Forecasts. Create meter-by-meter and month-by-month budgets based on past bills. | <input checked="" type="checkbox"/> | |
| Cost Avoidance (M&V). Calculates savings attributable to energy management by comparing current bills to normalized baseline year. Complies with IPMVP, Section C “whole building method”. | <input type="checkbox"/> | |
| Energy Procurement. Loadshapes and special reports provide the detailed data needed to make informed energy procurement decisions. | <input checked="" type="checkbox"/> | |
| Energy Use Intensity. Track weather normalized energy usage to determine long-term energy efficiency trends. | <input type="checkbox"/> | <input type="checkbox"/> |
| Normalization. Reports year-to-year usage after adjusting for changes in weather. | <input type="checkbox"/> | <input type="checkbox"/> |
| Rate/Tariff Analysis. Compare current utility billed rates to alternative rate schedules. | <input checked="" type="checkbox"/> | |
| Use vs. Weather. Compare month-to-month and year-to-year utility bills to see the impact of weather on your energy usage. | <input type="checkbox"/> | <input type="checkbox"/> |

Reporting & Presentation

| | | |
|---|-------------------------------------|-------------------------------------|
| Automated Report Distribution. Schedule and email report batches to distribution lists. | <input checked="" type="checkbox"/> | |
| Calendarization. Reports on calendar months instead of billing period. | <input type="checkbox"/> | <input type="checkbox"/> |
| Custom Spreadsheets for Data Export. Design custom spreadsheets for quick and easy export to Excel or other applications, for ad-hoc reporting. | <input checked="" type="checkbox"/> | |
| Energy Dashboard. Select and display configurable performance charts and graphs on your homepage. | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| PowerViews™. Exclusive EnergyCAP feature that puts current data at your fingertips. Trend charts and graphs that can be automatically displayed and dynamically updated. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| Project Tracking. Report the energy and cost savings from your energy management projects. | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

| | EnergyCAP Enterprise | EnergyCAP Express |
|---|-------------------------------------|-------------------------------------|
| Reports, Charts, & Graphs. View and analyze utility data from EnergyCAP's library of informative and easy-to-understand reports. | Over 250 Reports | Over 150 Reports |
| TreeView Navigation. User-friendly hierarchical structure of buildings, meters, accounts, & cost centers | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| Weather Data. Trend and analyze weather data and the impact on energy usage. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |

Sustainability & Compliance

| | | |
|---|-------------------------------------|-------------------------------------|
| ENERGY STAR Benchmarking. Interface to EPA's Portfolio Manager to obtain ENERGY STAR energy efficiency rating for buildings. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| Greenhouse Gas Emissions. Calculate and report the GHG emissions resulting from energy use. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |

Chargebacks & Tenant Rebilling

| | | |
|---|--------------------------|--|
| Bill Splits. Split bills by percentages for shared or unmetered facilities. | <input type="checkbox"/> | |
| MUVER™ Cost Recovery for Rentals. Move-In Utility Vacant Expense Recovery for multi-family apartment communities enables recovery of vacant unit costs resulting from continuous service agreements. | <input type="checkbox"/> | |
| Submeters & Chargebacks. Enter or import submeter readings to create chargeback "invoices" for customers, other departments, or tenants. | <input type="checkbox"/> | |

Meter Data Tracking

| | | |
|---|--------------------------|--|
| Interval (Time-Series) Data. Import and analyze meter interval data (usually 15, 30, or 60-minute intervals) for detailed energy consumption analysis. | <input type="checkbox"/> | |
| Meter Data Import. Import meter data for detailed use analysis and bill verification. | <input type="checkbox"/> | |

Web Access & Permissions

| | | |
|--|-------------------------------------|-------------------------------------|
| Microsoft® SQL Server®. Utilize Microsoft SQL Server for data storage and processing. Host your own EnergyCAP database, or we'll host it for you in our commercial data center. | <input checked="" type="checkbox"/> | ECI Hosts |
| Unlimited Number of Users. EnergyCAP is licensed for an unlimited number of users, so no need to worry about seat licenses or unexpected charges. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| User Permissions. Manage user rights on an individual basis or through the use of convenient, time-saving User Roles. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| Web Access. Access EnergyCAP from anywhere via internet connection. | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

Database Setup

| | | |
|--|-------------------------------------|-------------------------------------|
| Data Import Templates. Get started quickly and reduce manual keyboard data entry by importing your organizational and historical billing data into EnergyCAP. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| Implementation Services. Work directly with your ECI project manager to get EnergyCAP up and running quickly and correctly. Services include project management, data conversion and import, training, etc. | <input type="checkbox"/> | <input type="checkbox"/> |
| Setup Wizards. Setup Wizards throughout EnergyCAP walk you through new account and meter setup, budget creation, rate schedule setup, and more. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
