

ENERGYCAP HELPS

Emergency ENERGY MANAGEMENT

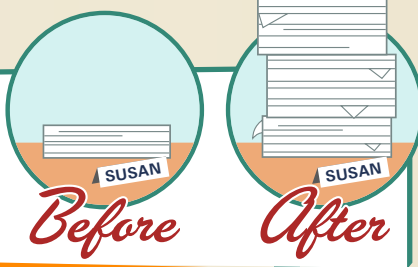

SAN BERNARDINO

Out Of A Fiscal Crisis

In 2012, four California cities declared a fiscal emergency and/or filed for bankruptcy. Under that gloomy economic cloud, the City of San Bernardino offers a silver lining.

Susan Davis

serves as San Bernardino's Departmental Accounting Technician, responsible for managing and paying the City's utility bills.

DAVIS TOOK ON MANAGEMENT OF:

- INTEGRATED WASTE
- FLEET
- OPERATION MAINTENANCE

AFTER THE CITY FILED FOR BANKRUPTCY PROTECTION, HER WORKLOAD INCREASED DRAMATICALLY.

With **2** ELECTRIC companies

TWO Water COMPANIES

a GAS company

and 9 months of backlogged **ENERGY BILLS**, San Bernardino needed a way to stop paying late fees.

DAVIS NEEDED utility bill management software that made it easy to manually enter

3,000 monthly utility bills

FORTUNATELY FOR DAVIS,

ENERGYCAP fit the bill.

and saved them money, too!

Almost immediately, City facilities that were wasting electricity and water were identified.

DAVIS HAS BEEN ABLE TO creatively fund energy savings projects by leveraging the City's utility bill history.

By aggregating **ACCURATE NUMBERS** for the City's electric bills,

Davis was able to apply for & receive a

\$375,000

grant to retrofit city lights.

The City tracks about **3,500** energy meters and **142** buildings including:

12 FIRE STATIONS

2 Senior Centers

a mall

4 LIBRARIES

police headquarters

minor league baseball stadium

Susan Davis wears many hats but that has not stopped her from becoming an effective energy manager.

Using EnergyCAP, Davis was able to reap the benefits of savings by seeing an accurate picture of the City's utilities profile. Not only has she saved tens of thousands of dollars, but she has generated funds for energy projects.
