

# MIAMI-DADE COUNTY

## Discovers the Power of Focused Leadership

The County's complex and constantly changing building portfolio includes more than **1,500** facilities:

43 Libraries

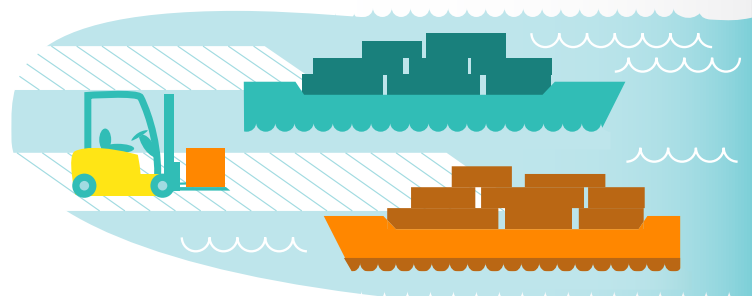

100 Parks

70 Fire Stations

Miami Int'l Airport

PortMiami

Miami-Dade County is home to

**2.5 million residents**

The County pays out **\$100 MILLION** every year in electricity expenses.

Miami-Dade didn't have a streamlined process for dealing with the

**54,000**

of electricity bills received each year.

Miami-Dade's energy leaders saw the value of providing the county with a single **UTILITY BILL MANAGEMENT SOFTWARE PLATFORM** for use countywide.

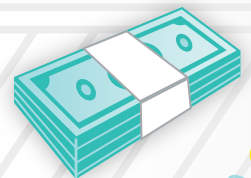

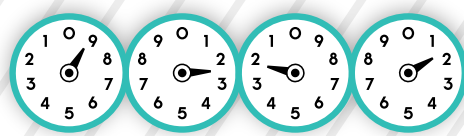

Miami-Dade's energy leaders brought together **200 EMPLOYEES** across **24 COUNTY DEPARTMENTS** under a single energy management umbrella through EnergyCAP energy management software.

Miami-Dade currently tracks **4,500** electricity meters

representing **1 billion kWh** of electricity consumption per year

with over **\$100 million** of expenses annually.

Miami-Dade began reaping the rewards of their efforts almost immediately.

The County expects annual ROI utility savings of **NEARLY \$2 MILLION**, representing 2% of the County's annual electricity expenses.
