## The Business Case: EnergyCAP Utility Bill Management Software

EnergyCAP is the trusted solution to centralize, manage, and maximize your utility, energy, and carbon data. With over 40 years of industry leadership, EnergyCAP is trusted by more than 10,000 organizations globally. It eliminates manual processes, transforms data into actionable intelligence, and drives measurable financial and sustainability outcomes.

### Business and technical problems we solve

Organizations struggle with siloed, manual, and inefficient energy and sustainability management systems, leading to:

- ▶ Excessive employee time spent on data entry and reporting.
- ▶ Lack of actionable insights due to fragmented energy data.
- ▶ Higher energy costs from undetected billing errors and inefficiencies.
- ▶ Difficulty tracking and achieving sustainability goals.

EnergyCAP UtilityManagement provides a comprehensive platform that automates data collection, ensures accuracy, and delivers real-time analytics to optimize costs and sustainability performance.

### Benefits of one system over several

Switching to a unified energy and sustainability software like EnergyCAP offers:

- ▶ **Cost avoidance:** Automated utility bill audits flag billing errors, reducing unnecessary expenses.
- ▶ **Time savings:** Organizations save an average of 37 hours per month in employee time.
- ▶ **Financial-grade GHG accounting:** Accurately track and report emissions to meet sustainability goals.
- ▶ **Integrated benchmarking and reporting:** Gain visibility with customizable dashboards and seamless ENERGY STAR Portfolio Manager integration.
- ▶ **Data accuracy and actionability:** Ensures clean, reliable data for making informed decisions.

### Key ROI metrics from EnergyCAP's customers

**10% YoY savings**  
on total utility bill costs for over half of customers.

**1 in 4 customers**  
achieve a full ROI within one year.

**2.6 years**  
average ROI across all customers.

**2.5x greater YOY**  
utility bill savings compared to other energy management solutions.

**4.7% of utility bills**  
flagged each month with actionable issues to cut costs.

**30+ hours per month**  
saved by Bill CAPture Services users, with 4x more flagged bill errors detected.

Build a compelling business case for smarter energy management with proven strategies and success stories.
